STAND ASSEMBLY INSTRUCTIONS

ONCE YOU HAVE REMOVED YOUR MACHINE FROM ITS BOX:

1. Turn the machine upside down, so that the top of the machine is resting on the floor and the back of the machine is facing you. NEVER LAY YOUR PACHINKO MACHINE FLAT (on its face or back).

2. Take the two stand brackets and place them on each end of the bottom of the machine (the end which is not touching the floor). Be sure that the washers welded to the stand are facing towards each other, and the center of the machine. The tall end of the bracket must be in the front of the machine, the short end in the back.

3. Move the brackets as close to the edges of the machine as possible.

4. Attach the brackets to the bottom baseboard with the enclosed flat-head wood screws. Make sure to tighten the screws as much as possible.

5. Put vinyl coverings over bottom of stand brackets to prevent marring furniture or other surfaces.

REFER TO THE PICTURE OF PACHINKO ON YOUR MAIN INSTRUCTION SHEET FOR REFERENCE AND PROPER POSITION.

6. Peel the back off the yellow instruction label and place it on the face of the machine. We recommend placing it over the multi-colored Nishijin logo. This will enable guests to know how to play your machine at a glance.

ADDITIONAL PARTS

Additional authentic Steel Pachinko Balls may be purchased directly from Target Abroad, Limited in quantities of 100 per bag. Replacement Battery Packs are also available, which include a battery cable, one battery, one replacement fuse, and bulbs. NO BATTERY PACK IS NECESSARY TO RUN YOUR MACHINE - ONLY TO LIGHT UP THE JACKPOT LIGHT.

USE THE CONVENIENT ORDER FORM ON THE REVERSE SIDE FOR ORDERING
SOME OF THE QUESTIONS MOST FREQUENTLY ASKED:

Q. What is the key hole for?

A. In Japan when the machine is mounted into the wall, as they always are, the back of the machine is accessible to a parlor employee by turning a special key and opening the entire frame of the machine. These keys are obviously not available to the general public and since the back of your machine is easily accessible to you, a key is not necessary.

Q. Why doesn't the plastic cup fit into the space provided?

A. In Japan the balls are fed to the machine through pneumatic tubes. We provide a cup to hold your 500 balls. However, the size required is larger than the space provided. Just fit your cup in as best you can - it will work.

Q. If I cannot make either or both of the lights work, does it mean I have a defective machine?

A. No. As we have stated on the instructions, the machine needs no batteries to run properly. We have included a battery conversion kit as a FREE convenience item for you. However, we are unable to guarantee the electrical wiring on the machine due to its foreign origin. We hope you will understand.

If you have any questions - please feel free to write us. We would appreciate hearing from you. Thank you for buying a NISHIJIN PACHINKO MACHINE.

May we suggest that you always check your dump lever (20) to be sure it is closed - before putting balls into your machine.
